Scudo
Design by Gensler

**Freestanding
and worksurface screens**

Scudo

In Italian, “scudo” means shield, a protective device. During the Renaissance, shields were more than armament: they were revered forms of sculpture, with Milan as the center of this artistry. Fast forward to today. The idea of protection takes on new meaning, and shields play a different role as we return to our offices.

Rexite introduces Scudo: a collection of freestanding and worksurface screens that encloses space with artistry. Inspired by the past but designed for the present, Scudo creates interior environments where people feel more protected, relaxed, inspired. Transform your workplace into a sculpture garden with the beautiful, shielding shapes of Scudo.
